**Subject:** fertilizer issue

Pam,

I talked to Karl today regarding the fertilizer issue within the Sunnyside permit. Originally we were asked, by DOGM, to pull the fertilizer out. We had no problem with that, it would help reduce the bond.

At this point, Sunnyside feels there is no advantage to pulling the fertilizer out of the permit. SCA would like to have the fertilizer amendment with drawn at this point and time.

Also, just wondering if there is anything new on the bond escalation issue. Karl thought a decision might have been made. Thanks Pam
